

Shingle & Slate Vent LV50

Application

The LV50 vent from J.A. Plast is a discreet and efficient choice for ventilation of unheated attics and batten cavity.

Please refer to national standards.

Available as:

LV50 for bitumen and shingles

LV50 for 300x600 mm slate

- For low profile roofs shingle and slate
- For pitched roofs min. 25°
- 5,000 mm² ventilation area

Design

LV50 is a low-profile vent with a custom-made base plate for shingles or slate.

The design of the LV50 leads rainwater away from the ventilation area and a built in grille protects against insects.

Easily installed with the rest of the roofing material it presents a nicely integrated ventilation solution.

Colour and Surface

Special coloured, glossy or structured with sand or granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

Materials

The vent is manufactured from HIPS (High Impact Polystyrene).

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

LV50 for 300x600 mm slate
